

## Upcoming event and dog photo contest. Deadline: November 1st.

3-D printing sounds fun? Well, once you hear that 3-d printers make toys for dogs, it will get a lot more **REAL!!!** We are thrilled to announce that the first prototype has been made and tested with a few dogs already. The results were breakthrough, and have already gained excitement from our fans on twitter.

Every week I will be asking for some encouragement and participation by sending in photos for the dog photo contest. Speaking of progress, I am glad to announce that the photos of 151 breeds are coming together. We have received about 20 photos of purebreeds, and can't wait to show you the finalists. Keep the photos coming by posting to the discussion above. :)

Many thanks to everyone who has contributed to the early days of building a fun place for pet Owners.
